

Study Abroad in Rotterdam & London

Hydrology and Nature Based Solutions & Environmental Sustainability

SUMMER 2025

Rice University & LSU students have the opportunity to study abroad in The Netherlands and England through a six week program starting in June of 2025.

Program Details

The program consists of two 15 day courses for 20 students. The first course, Hydrology & Nature Based Solutions, will be held in Rotterdam and led by Dr. Philip Bedient of Rice University. The second course, Urban Infrastructure & Environmental Sustainability, will be held in London and led by Dr. John Pardue of LSU. The program will consist of class room instruction and several weekly field trips. Participants will earn six university credits. The program would also allow for meaningful interactions with faculty and students from Rice, LSU, British Universities, & TU Delft, one of the premier universities in the world addressing hydraulics and coastal defense systems.
